- Assignment

■ Review of POS, NER and BOW

POS

grammatical role of each word

NER

real-world label of each word

BOW

count how many times each word appears

■ Stop words

****Stop words**** are common words like ***the, is, and*** that add little meaning and are usually removed.

Before:

The food is very good and the service is nice.

After (stop words removed):

food, good, service, nice

N-gram

****N-gram**** means ****a group of N words taken together****.

That's it — super simple.

- ****Unigram**** → 1 word → ***food***
- ****Bigram**** → 2 words → ***food is***
- ****Trigram**** → 3 words → ***food is good***

N-grams help us see word patterns, not just single words.

If you want, I can show ****ngram code**** or ****ngram examples****.

Assignment

- I want you guys to do POS tagging, NER, BoW, stop-words filtering, and N-gram feature extraction on the IMDB 50K movie-reviews dataset.

Summary

- ✓ Review of POS, NER, BoW, Stopwords, N-gram
 - ✓ POS tagging — Identified grammatical roles of words in IMDB reviews.
 - ✓ NER — Extracted entities such as PERSON, ORG, DATE, WORK_OF_ART.
 - ✓ Bag of Words — Converted text into word-frequency features.
 - ✓ Stop-words removal — Reduced noise by removing common non-informative words.
 - ✓ N-gram features — Captured word-sequence patterns (unigrams + bigrams).

Thank You
